## PERSONAL PROJECTS

### Portfolio Website [🔗](#)

- Portfolio Website is a platform to showcase my skills. it represents multiple projects, work experience, skills and about me.
- I have used react JS, tailwind CSS with react icon & smooth scroller for better user experience.
- For making this project more responsive Media Query is used.
- Link :- <https://adityakrjha112.github.io/>

### News Monkey [🔗](#)

- News Monkey displays world wide news with latest information.
- it has various sections i.e. Business, Entertainment, Health, Science, Sports and Technology with recently updated news.
- For making this project more responsive react JS, Bootstrap, react-router and News API is used.
- Git link :- <https://github.com/Adityakrjha112/News-Website>

### Expense Tracker [🔗](#)

- Expense Tracker is used to track your day to day expenses and incomes
- It is simple and user friendly easy to use.
- it saves all the expenses records in your local storage.
- For making this project more responsive react JS, CSS, Style-component is used.
